**Sub-District 6 - Paul Perreault:** A discussion arises regarding the size of a culvert that would be feasible off Highway 302. A survey will be required for this project. Mr. Oswald put forward that the proposed 30" culvert would not accomplish the original intent. The consensus is that a 24" culvert would be more appropriate in that area.

Mr. Oswald, on behalf of the R.M. of La Broquerie introduces his two other concerns:

a) Erosion in the ditch on St. Denis Road in the R.M. of La Broquerie north of P.T.H. 52 needs to be addressed and is requesting more information on solutions to the problem.

b) Fireguard 13, south of Marchand. The angle of the culvert is causing erosion problems and needs to be corrected. A project had been assisted by the SRRCD in 2006 and the consensus is that the ongoing problems need to be addressed. A ford rock crossing will be installed to address high water issues. Riprap will be installed on the eroded bank to repair it. Several miles further south, material was washed away around a culvert under F.R. 13. This situation will be addressed in conjunction with the previous project.
